method, and its particularities in the first experiment. The author failed to find a clear-cut relationship between the number of cycles and the velocity of the reaction, which may be explained by the fact that the reaction time was too great for a significant increase in the reaction rate.

the first time, and the first time I have ever seen a man do it.

Additional specific formulas for rearing different ages of A. dorsalis at a particular stock density will be written separately and to be available to individuals interested in rearing A. dorsalis to early life stages. The following formulas are intended for use by aquaculturists for rearing A. dorsalis from hatching to approximately 10 mm total length.
