G That's true, it's not an exaggeration or any hyperbole to say that we have to make sure that our application is as efficient as possible, or if we're not doing that, then we're not making the most of our resources. The third is to increase the amount of time spent on each application while the entire amount is divided among many users. This is the most effective method.

Consequently, the message of the event is much advanced by the amount of time that has passed since the momentary effect was added to the original message. This is because the message is more likely to be remembered if it is associated with a recent event.
