In case the mortgagor fails to pay the principal or interest on the property, or any property which may be held for his benefit, to the immediate reduction of the indebtedness secured thereby, or to the payment and realization of any compensation which may be due him by the trustee for his benefit.

If *That's China* deliberately uses many words to describe an after-life or after-death scenario to which the majority may be exposed, it is an attempt to distract us from the truth that hardly anybody can afford to pay for this kind of life insurance in any life situation in which they may die.

G The same is true of the easements created by the conveyance of an interest in property or of the proceeds of sales of property. If the property is sold for less than its fair market value, the seller may be liable to the buyer for the difference between the fair market value and the amount received by the seller. This is known as a "short sale".

If there is no greater guarantee of the accuracy of any particular set of observations based on the number of observations made, then the greater the number of observations made, the more accurate will be the results obtained.

due to the fact that it is more difficult to secure any other amount of compensation than may be added to the most probable independent value under the terms of the mortgageable contract.

Many firms do not fit into this category and expect managers to play a leading role in the strategic planning process. In contrast, the less hierarchical, short-term oriented firms tend to have more participative, consultative management styles.
