THIS INDENTURE, made April 29
IN JOINT TENANCY

, 1993 between HAZEL ANN BAKER AND JAMES BAKER

herein referred to as "Trustors," and CHICAGO TITLE AND TRUST COMPANY, an Illinois corporation doing business in Chicago, Illinois, herein referred to as TRUSTEE, witnesseth:

THAT, WHEREAS Trustors are justly indebted to the legal holders of the Instalment Note (the "Note") made payable to THE ORDER OF BAKER and hereinafter described, said legal holder or holders being herein referred to as the "Holders of the Note"

 in the Total of Payments of \$ 11,712.00 or in the Principal or Actual Amount of Loan of \$

, together with interest on unpaid balances of the

Actual (Principal) Amount of Loan at the Rate of Charge set forth in the Note.

It is the intention hereof to secure the payment of the total indebtedness of Trustors to the Holders of the Note, within the limits prescribed herein whether the entire amount shall have been advanced to Trustors at the date hereof or at a later date.

NOW, THEREFORE, Trustors to secure the payment of the said principal sum of money and said interest in accordance with the terms, provisions and limitations of this Trust Deed, and the performance of the covenants and agreements herein contained, by Trustors to be performed, and also in consideration of the sum of One Dollar in hand paid, the receipt whereof is hereby acknowledged, do by these presents CONVEY and WARRANT unto Trustee, its successors and assigns, the following described real property and all of their estates, right, title and interest therein, situated, lying and being in the CITY OF Chicago
COUNTY OF Cook AND STATE OF ILLINOIS,

to wit:

Lot 77 in Fife and Young's Subdivision of that part of Lot 8, lying west of Wallace Street in Auditor's Division of the South 1/2 of the South 1/2 of the Southwest 1/4 of Section 4, Township 38 North, Range 14 East of the Third Principal Meridian, in Cook County, Illinois.

PIN 20-04-328-020

which, with the property hereinafter described, is referred to herein as the "premises."

TOGETHER with all improvements, tenements, easements, fixtures, and appurtenances thereto belonging, and all rents, issues and profits thereof for so long and during all such times as Trustors may be entitled thereto (which are pledged primarily and on a parity with said real estate and not secondarily) and all apparatus, equipment or articles now or hereafter therein or thereon used to supply heat, gas, air conditioning, water, light, power, refrigeration (whether single units or centrally controlled), and ventilation, including (without restricting the foregoing), screens, window shades, storm doors and windows, floor coverings, indoor beds,awnings, stoves and water heaters. All of the foregoing are declared to be a part of and premises whether physically attached thereto or not, and it is agreed that all similar apparatus, equipment or articles hereafter placed in the premises by Trustors or their successors or assigns shall be considered as constituting parts of the premises.

TO HAVE AND TO HOLD the premises unto Trustee, its successors and assigns, forever, for the purposes, and upon the uses and trusts herein set forth, free from all rights and benefits under and by virtue of the Homestead Exemption Law of the State of Illinois, which said rights and benefits Trustors do hereby expressly release and waive.

This Trust Deed consists of two pages. The covenants, conditions and provisions appearing on Page 2 (the reverse side of this Trust Deed) are incorporated herein by reference and are a part hereof and shall be binding on the trustors, their heirs, successors and assigns.

WITNESS the hand _____ and seal _____ of Trustors the day and year first above written.

[SBA1.]

James Baker

[SBA1.]

INTERFACIAL POLYMERIZATION OF THE BORONIC ACID MONOMER

Some of the most interesting results in this paper are the payoffs and the probabilities of any particular action, given the information available to the players. For example, consider the following situation: Player 1 has two possible actions, A and B, and Player 2 has three possible actions, C, D, and E. The payoffs for each player are as follows:

The European Union has adopted a new strategy to combat climate change, which aims to reduce greenhouse gas emissions by at least 40% by 2030 compared to 1990 levels. This will be achieved through a combination of policy measures, including the introduction of a carbon price, the promotion of renewable energy sources, and the development of energy efficiency standards.

As a result, the first two years have been filled with a steady and deliberate pace of growth and development. The first year focused on establishing a solid foundation in the field of early intervention and education. This included attending numerous training sessions, reading research papers, and participating in practical experiences such as shadowing experienced professionals and observing children with developmental delays. The second year involved more advanced topics like specialized interventions for autism spectrum disorder, language delay, and sensory processing disorders. It also included developing individualized education plans (IEPs) and working closely with families to provide support and guidance. The third year will build upon these foundations by delving deeper into specific areas of intervention, such as speech therapy for articulation disorders or occupational therapy for fine motor skills. Additionally, there will be opportunities for research projects and presentations at professional conferences.

and the same proportion of the total population as in the United States. The number of persons per family is about the same in both countries, but the average size of the family is larger in the United States.

In 1980, around 10% of the population were under 15 years old, while in 1990, this figure had risen to 17%. The number of children aged 0-14 years increased from 1.2 million in 1980 to 1.6 million in 1990. The number of children aged 0-4 years increased from 400,000 in 1980 to 500,000 in 1990. The number of children aged 5-14 years increased from 800,000 in 1980 to 1.1 million in 1990.

For more information about the new benefit of self-decrease, please see the application example of Decrease mode in the following section.

After the initial donation, we will keep you updated on our progress and provide you with periodic reports. Your support is crucial to our mission, and we are grateful for your continued interest and generosity.

For example, in the case of a two-dimensional system, the potential function $V(x, y)$ is defined by the formula $V(x, y) = \frac{1}{2}m(\dot{x}^2 + \dot{y}^2) + V_0$, where m is the mass of the particle, \dot{x} and \dot{y} are the components of its velocity, and V_0 is the constant value of the potential function at the origin.

The first point to consider is the nature of the problem. If the problem can be described and solved in the language of probability, it is better to approach it from that perspective.

As a result, the new model of the economy is based on the assumption that the market is not perfect and that there are significant externalities. The model also takes into account the fact that the economy is not static and that it is subject to constant change. The new model also emphasizes the importance of environmental factors and the need to protect the environment.

As a result, the first step in the process of developing a new product is to identify the needs and wants of the target market.

After the operation of the filter bank, each channel is processed by a set of parallel filters, which are designed to obtain the desired features.

As a result, the new system will be able to identify and track individual patients more accurately, leading to better care and improved outcomes.

As a result, the new system will be able to identify the most effective treatment for each individual patient based on their specific genetic profile. This will lead to more personalized and effective cancer treatments, ultimately improving patient outcomes and reducing costs.

provided by the government, and the government's role in the economy is limited to providing infrastructure and maintaining law and order.

As a result, the study of the relationship between the two variables is of great interest. In this paper, we propose a new approach to estimate the relationship between the two variables.

and double standards that undermine the credibility of our institutions and our political process. The public deserves better.
