1) This is our first rule of battle to prevent us from getting into the trap of the other person's logic. But it's also important to remember that the other person's logic is often based on their own interests, so we need to be careful about what we say and how we say it.

2) Many of us tend to jump to conclusions without fully understanding the situation. This can lead to unnecessary conflicts and misunderstandings. So it's important to take a step back and really listen to what the other person has to say before jumping to conclusions.

3) Another common mistake is to assume that the other person's logic is always wrong or misguided. This can lead to unnecessary conflicts and misunderstandings. So it's important to be open-minded and willing to consider the other person's perspective.

4) Finally, it's important to remember that the other person's logic is often based on their own interests, so we need to be careful about what we say and how we say it.

A. **Interest** (1) To pay and seek rewards and the incentive theory suggests the need of pay for work and effort. **Properties** (2) The individual's interest in a task may be influenced by the task itself, personal needs, past experiences, personal interests, knowledge, values, etc. **Perception** (3) In order to perceive the properties of a task, the individual must have the ability to perceive them. **Expectancy** (4) The individual's expectation of reward and the probability of getting it. **Value** (5) The individual's value of the task. **Effort** (6) The individual's effort put into the task. **Properties** (7) The properties of the task. **Perception** (8) The individual's perception of the task. **Expectancy** (9) The individual's expectation of reward. **Value** (10) The individual's value of the task. **Effort** (11) The individual's effort put into the task. **Properties** (12) The properties of the task. **Perception** (13) The individual's perception of the task. **Expectancy** (14) The individual's expectation of reward. **Value** (15) The individual's value of the task. **Effort** (16) The individual's effort put into the task. **Properties** (17) The properties of the task. **Perception** (18) The individual's perception of the task. **Expectancy** (19) The individual's expectation of reward. **Value** (20) The individual's value of the task. **Effort** (21) The individual's effort put into the task. **Properties** (22) The properties of the task. **Perception** (23) The individual's perception of the task. **Expectancy** (24) The individual's expectation of reward. **Value** (25) The individual's value of the task. **Effort** (26) The individual's effort put into the task. **Properties** (27) The properties of the task. **Perception** (28) The individual's perception of the task. **Expectancy** (29) The individual's expectation of reward. **Value** (30) The individual's value of the task. **Effort** (31) The individual's effort put into the task. **Properties** (32) The properties of the task. **Perception** (33) The individual's perception of the task. **Expectancy** (34) The individual's expectation of reward. **Value** (35) The individual's value of the task. **Effort** (36) The individual's effort put into the task. **Properties** (37) The properties of the task. **Perception** (38) The individual's perception of the task. **Expectancy** (39) The individual's expectation of reward. **Value** (40) The individual's value of the task. **Effort** (41) The individual's effort put into the task. **Properties** (42) The properties of the task. **Perception** (43) The individual's perception of the task. **Expectancy** (44) The individual's expectation of reward. **Value** (45) The individual's value of the task. **Effort** (46) The individual's effort put into the task. **Properties** (47) The properties of the task. **Perception** (48) The individual's perception of the task. **Expectancy** (49) The individual's expectation of reward. **Value** (50) The individual's value of the task.
