Figure 1 shows a scatter plot of the relationship between the \log_{10} of the mean response and the \log_{10} of the mean error for each of the four conditions. The data points are clustered into four distinct groups corresponding to the four conditions: (1) no feedback, (2) open-loop feedback, (3) closed-loop feedback, and (4) closed-loop feedback with a 10% error. The data points for condition (1) are scattered around the zero line, indicating no significant relationship. The data points for conditions (2), (3), and (4) show a clear positive linear trend, indicating that as the mean response increases, the mean error also increases. Condition (2) has the steepest slope, followed by condition (3), and then condition (4). Condition (4) shows a slight decrease in slope compared to conditions (2) and (3) at higher response values.

If this Security Instrument secures a guaranty between Lender and Mortgagor, Mortgagor agrees to waive any rights that may prevent Lender from bringing any action or claim against Mortgagor or any party indebted under the obligation. These rights may include, but are not limited to, any anti-deficiency or one-action laws. Mortgagor agrees that Lender and any party to this Security Instrument may extend, modify or make any change in the terms of this Security Instrument or any evidence of debt without Mortgagor's consent.
