(C) Calculation of Changes

Before each Change Date, the Note Holder will calculate my new interest rate by adding a "margin" of 2.750 percentage points (2.750 %) to the Current Index. The Note Holder will then round the result of this addition to the nearest one eighth of one percentage point (0.125%). Subject to the limitations in Section 4(D) below, this rounded amount will be my new interest rate until the next Change Date.

The Note Holder will then determine the amount of the monthly payment that would be sufficient to repay the unpaid principal that I am expected to owe at the Change Date in full on the Meturity Date at my new interest rate in substantially equal payments. The result of this calculation will be the new amount of my monthly payment.

(D) Limite on Interest Rate Changes Side

On the second Change Date and each Change Date thereafter, the interest rate may not increase or decrease more than two percentage points (2.00%) from the interest rate immediately prior to the Change Date.

There is a limit of four percentage points (4.00%) on the amount by which the Interest rate may increase of decrease from the initial interest rate over the entire term of the loan. If a change in the Current index would otherwise cause the new interest rate to exceed the two percentage points (2.00%) or the four percentage points (4.00%) rate adjustment limitations, the unused portion of such increase or decrease will not be carried forward and applied to change the rate in future years. My interest rate will never be greater than \$\frac{12.375}{3.375} \times \text{%}, or less than
