The interest rate may change on the first day of OCTOBER 18t , 1957 , and on that day of each succeeding year. "Change Date" means each date on which the interest rate could change.

(B) The Index

Beginning with the first Change Date, the interest rate will be based on an Index. "Index" means the weekly average yield on United States Treasury Securities adjusted to a constant maturity of one year, as made available by the Federal Reserve Board. "Current Index" means the most recent Index figure available 30 days before the Change Date. (C) Calculation of Interest Rate Changes

Before each Change Date, Lender will calculate a new interest rate by adding a margin of TWO AND THREE QUARTERS—percentage point(s) (2.750 %) to the Current Index and rounding the sum to the nearest one-eighth of one percentage point (0.125%). Subject to the limits said in paragraph (D) of this Rider, this rounded amount will be the new interest rate until the next

The existing in crest rate will never increase or decrease by more than one percentage point (1.0%) on any single Change Date. The interest rate will never be more than five percentage points (5.0%) higher or lower than the initial interest rate, as stated in Paragraph 2 of the Note.

(E) Calculation of Payment Campe

If the interest rate changes on a Change Date, Lender will calculate the amount of monthly payment of principal and interest which would be increasing to repay the unpaid principal balance in full at the Maturity Date at the new interest rate through substantially equal payments. In making such calculation, Lender will use the impaid principal balance which would be own; on the Change Date if there had been no default in payment on the Note, reduced by the amount of any prepayment to principal. The result of this calculation will be the amount of the new monthly payment of principal and interest.

(F) Notice of Changes
