(A) Change Dates

The interest rate I will pay may change on the first day of August , 1997, and on that day every sixth month thereafter. Each date on which my interest rate could change is called a "Change Date."

The "Index" is the average of interbank offered rates for six-month U.S. dollar-denominated deposits in the London market ("LIBOR"), as published in The Wall Street Journal. The most recent Index figure available as of the date 45 days before each Change Date is called the "Current Index."

If the Index is no longer available, the Note Holder will choose a new index that it based upon comparable information. The Note Holder will give me notice of this choice.

(C) Calculation of Changes

Before each Change Date, the Note Holder will calculate my new interest rate by adding
Hundred Twenty Six Thousandths percentage point(s) (6.126 %) to the Current
Index. The Note Holder will then round the result of this addition to the nearest one-eighth of one percentage point
(0.125%). Subject to the limits stated in Section 4(D) below, this rounded amount will be my new interest rate until the
next Change Date.

The Note Holder will then determine the amount of the monthly payment that would be sufficient to repay the unpaid principal that I am expected to owe at the Change Date in full on the Maturity Date at my new interest rate in substantially equal payments. The result of this calculation will be the new amount of my monthly payment.
